

Hello, My name is [Insert your name] I live in [town/state/zip code]. I am calling to ask you for your attention to the the climate crisis.

Right now, world leaders, scientists and climate advocates are meeting at COP29 to discuss solutions for the climate crisis. Addressing the climate crisis has never been more urgent as the **United Nations has stated that an average of 21.5 million people are displaced each year** due to climate change related natural disasters. This number is expected to be 1.2 billion by 2050. We have no time to waste to act on reducing the impact of climate change.

I urge you to prioritize climate action to prevent large scale shortages of food and drinking water, mass extinctions of plant and animal life, and the displacement of millions driven from their homes by rising sea levels, drought, famine and fire. I urge you to prioritize climate policies in a list of competing priorities.

As your constituent, I want our community to lead the effort in global change. By doing so, we can set an example for other communities and contribute to the global effort to combat climate change.

I thank you for your time and consideration on this matter.

**CLIMATE ACTION NOW**
